AGENDA – of PRESENTATIONS

DRG Implementation

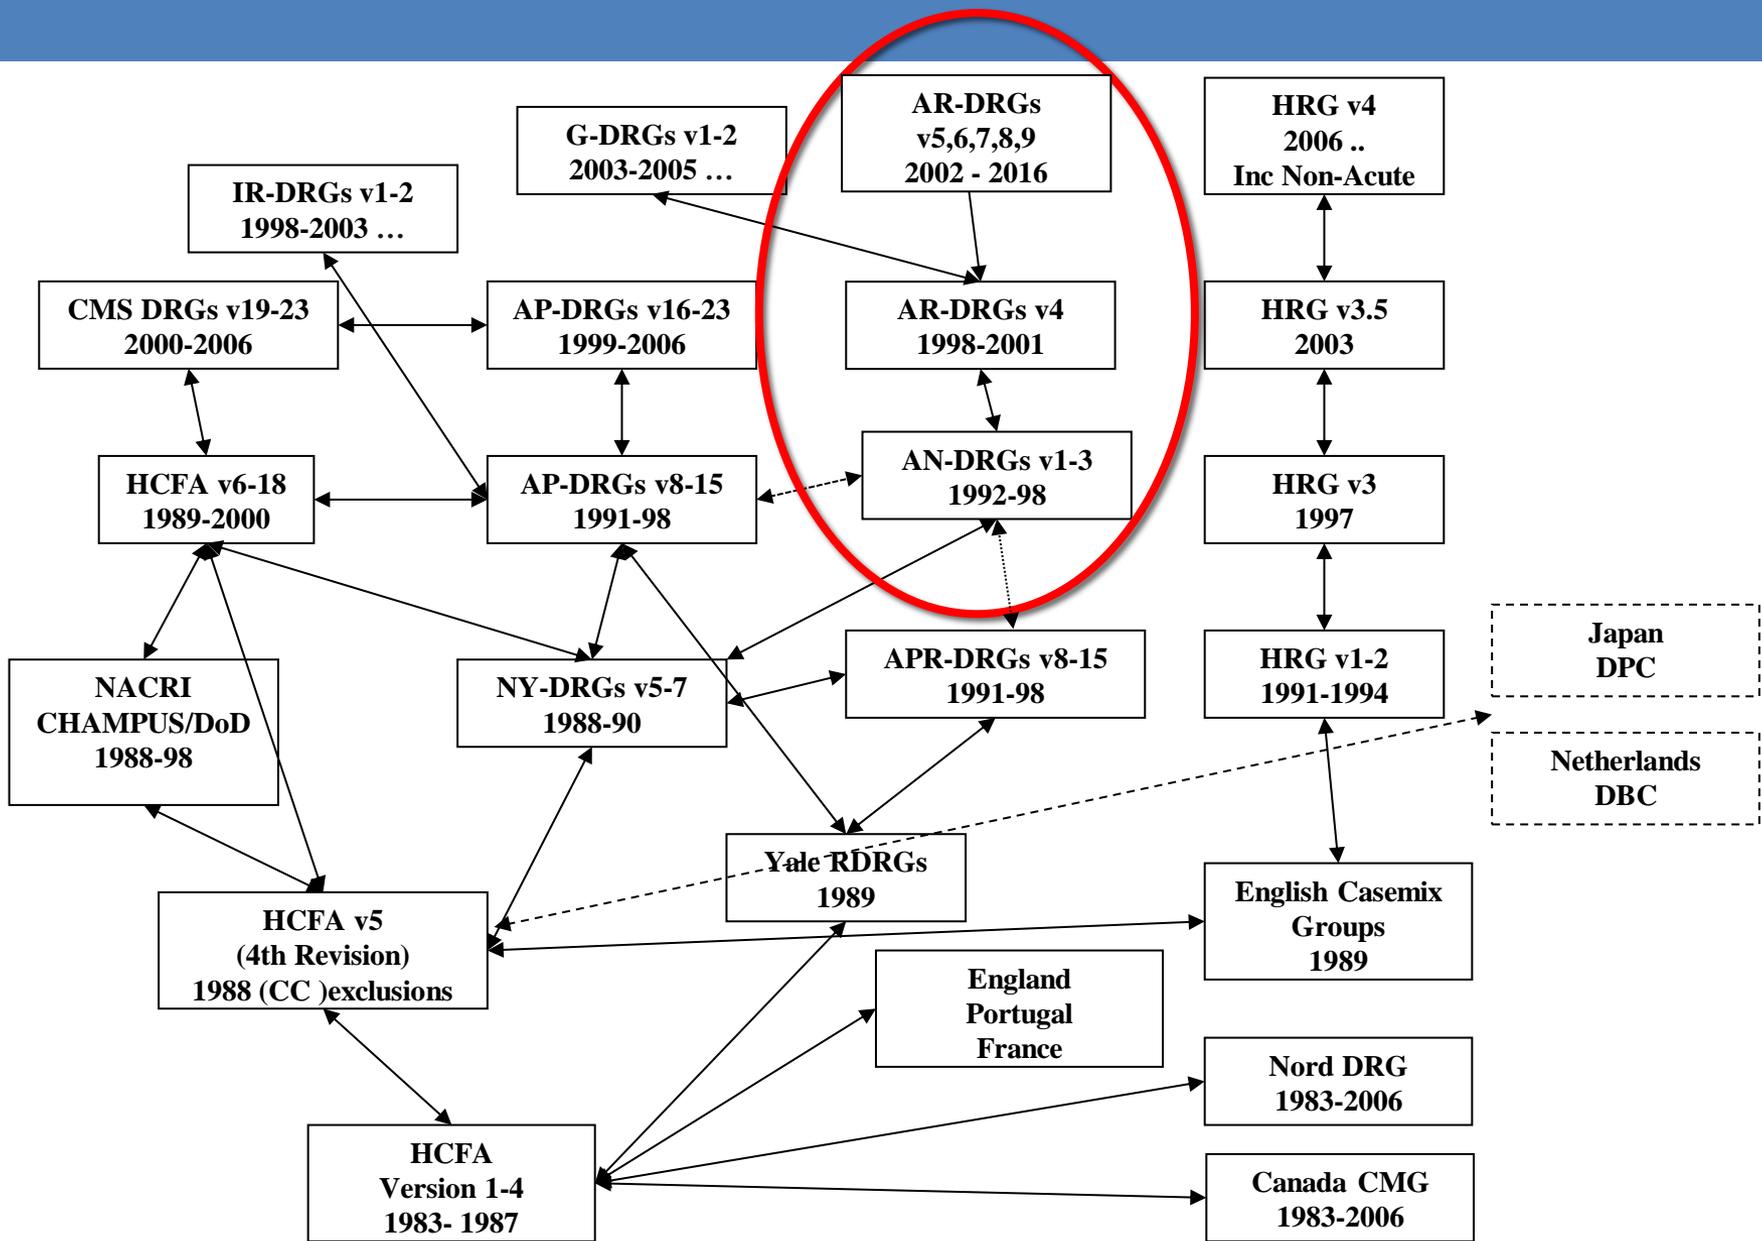

1. WHY: ICT - DRG PRICING and improving healthcare
 - Making PERFORMANCE information work for better healthcare
2. WHERE: DRG IMPLEMENTATION IN PHILIPPINES
 - Scheduling the implementation phases – and achieving improvement
3. WHAT: DRG grouping and required information support
4. HOW: USING ICT - DRG DATA for performance
 - Asking the questions that stimulate improvement.

THE DRG

- Used to describe and compare caseload and casemix
- Describes types of episode of care – particularly inpatient
 - a key international reference standard since 1990's
- 400 800 categories depending on degree of detail used
- Description of episode based on:
 - Principle diagnosis
 - Procedures
 - Additional diagnoses
 - Severity and complexity of the episode of care
 - Characteristics of patient
 - Reasons for admission and mode of discharge
- Normative costs and resource utilization tabulated
- May be priced and used for payment and benchmarking

DRG development

- Four guidelines are important as guiding principles for the DRG system's formation:
 - The patient characteristics used in the DRG definition should be limited to information routinely collected on the hospital billing form.
 - There should be a manageable number of DRGs that encompass all patients seen on an inpatient basis.
 - Each DRG should contain patients with a similar pattern of resource intensity.
 - Each DRG should contain patients who are similar from a clinical perspective (i.e., each class should be clinically coherent).
- Resource homogeneity **AND** Clinical meaning

Australian Refined DRG (AR-DRG) EXAMPLE

- AN-DRG v1.0 to v3.2
 - 1992 updated annually – until ICD-10 and AR-DRGv4 - 1997
 - 23 MDCs, 665 DRGs – Surgical hierarchy, principal diagnosis
- ICD-10-AM (Dx, ACHI, ACS) – "THE AR-DRG SYSTEM"
- AR-DRGV4 – 1998 biannually – Increase in groups with CC splits – v6 2008 –
- Commonwealth of Australia, Department of Health and Ageing
 - Clinical Casemix Committee – CCCGs classification refinement
 - Now contracted by IHPA to consortium led by NCCH University of Sydney
