

PHILHEALTH STRATEGY MAP 2024-2030

The PhilHealth Strategy Map provides the blueprint of the strategies that the Corporation will implement from 2024 to 2030. It is a one-page visual representation of an organization's strategy towards the achievement of its Vision. It is the concise version of the entire Strategic Plan document depicting the key strategic elements and the cause-and-effect logic between them.

The map is composed of four Perspectives or Strategic Blocks. Each perspective is a dimension or framework of organizational performance:

- **Member Satisfaction (Intermediate Results):** supports the health sector goals of improving financial risk protection (FRP) and reducing out-of-pocket payment through an increased utilization of health care services (particularly primary care), higher FRP, and high quality health services.
- **Sustainability:** Focuses on reforms for expanding service coverage, moving towards strategic purchasing, and improving policies and processes to adequately respond to the health reforms and challenges.
- **Efficiency and Transparency:** Focus on the drivers for effective fiscal management and resource allocation for health including strategic interventions for human resource management, information system enhancement, strategic communication and organizational development.

Each perspective is then made up of a defined set of strategic objectives. These are essentially specific goals that an organization aims to achieve in support of its broader strategy.

MEMBER SATISFACTION (Intermediate Results)

IR 1	Nagagamit ng Nakararami Increased utilization of benefits with focus on primary care services	<ul style="list-style-type: none">• Strengthen financing for primary care by:• Enabling availment of primary care benefits• Ensuring financial viability and quality of primary care benefit delivery• Increase PhilHealth spending to achieve target percentage share in current health expenditure by 2030
