## Invitation to Proponents of Open Source Electronic Medical Records

THE Philippine Health Insurance Corporation will be shifting to full electronic claims soon. In preparation, it is inviting proponents of open source electronic medical records to participate in the creation of a reference implementation of PhilHealth's electronic claims system. The reference implementation will serve as a guide to hospitals, clinics, pharmacies, developers, implementers and academe on how to integrate PhilHealth e-claims standards into their own systems.

Interested participants should meet the following qualifications:

- a] Public institutions or private institutions duly-registered with SEC
- b] At least five (5) years experience with open source electronic medical records
- c] With installations of the EMR in at least three facilities
- d] Source code is provided to the facilities
- e] Source code is available in online repositories such as github and/or sourceforge under any of the licenses listed at [www.opensource.org](http://www.opensource.org)

Qualified participants will be called to an organizational meeting on the second week of February. Please submit the following details:

- Name of Organization
- Contact Person
- Email
- Phone
- Name of open source EMR
- Year of implementation
- Installed in which facilities
- URL of organization
- URL of source code repository

Open source developers who meet the above criteria are requested to contact Ms. Lynette Geronimo ([lyn4ella@gmail.com](mailto:lyn4ella@gmail.com)) and/or Ms. Maritz Pasuengos ([maritzvp@gmail.com](mailto:maritzvp@gmail.com)) from the Office of the Chief Information Officer.

**DR. EDUARDO F. BANZON**  
President and CEO
