

ACR SEARCH MOBILE APPLICATION FOR ANDROID PLATFORM NOW AVAILABLE

Effective February 15, 2017, the **PhilHealth All Case Rates (ACR) Search** mobile application will be available through Play Store.

The mobile application, which can be downloaded by Android users free of charge, was developed to provide a facility for PhilHealth members and non-members to search for PhilHealth's compensable illnesses and procedures. The result of the search will display the ICD-10 code, the complete description of the illness and the allowable reimbursable benefit amount.

The application is also a means through which PhilHealth members and non-members may be informed of the benefits under the National Health Insurance Program (NHIP). Although the same feature is available in the corporate website, this application banks on the Filipino's wide use of mobile technology to immediately access information on the medical conditions and surgical procedures being paid for by PhilHealth through the ACR mechanism.

At the same time, the mobile application may be utilized by medical practitioners or coders to ensure accurate reporting of the ICD-10 codes to facilitate proper processing of the claims.

Further inquiries and concerns regarding this advisory may be directed to our Corporate Action Center at (02) 441-7442.
