

PORTAL FOR PROFESSIONAL HEALTH CARE PROVIDERS

To improve ease of health care providers in doing business with PhilHealth, the Corporation developed the PhilHealth portal for health care professionals, the “Health Care Professional Portal.” This is in addition to the online services offered to our partners and members.

This system will enable health care professionals to monitor/track the PhilHealth benefit of their patients. In addition, it will provide the status of claims filed by health care providers/facilities and their date of reimbursement, thus a tool to check the compliance of health care institutions to the provision of PhilHealth Circular No. 0035, s.2013 (ACR Policy No. 2 – Implementing Guidelines on Medical and Procedures Case Rates) re: distribution of the reimbursement within thirty (30) calendar days from the date of receipt of the same by the Health Care Institution (HCI).

The portal is now open for all health care professionals with active accreditation status, upon registration. It can be accessed through ***<https://partners.philhealth.gov.ph>***.
