

.....

AVAILABILITY OF STORAGE FOR HEALTH CARE INSTITUTIONS

To improve the process of transmission and for all Health Care Institutions (HCIs) to immediately know the status of attachments being transmitted, PhilHealth is providing storage for claims attachments to HCIs. All HCIs shall transmit their attachments to PhilHealth provided storage and coordinate with their Information Technology (IT) developers for the necessary adjustments in their information systems.

PhilHealth Regional Offices (PROs) will provide orientation to their respective HCIs, provide guidelines and release the corresponding technical specifications starting October 21, 2019. Storage service shall be available starting December 2, 2019 for testing. The HCIs shall then provide feedback on the status of their development afterwards.

BGEN. RICARDO C. MORALES, AFP (RET) FICD

President and Chief Executive Officer
